Introduction

Created with the Personal Edition of HelpNDoc: [Produce Kindle eBooks easily](#)

General Description

General Description

Our program is a software solution similar to other social websites like Facebook/Twitter. Our program resembles more with Twitter because it seems to us more intuitive and easier to use.

Created with the Personal Edition of HelpNDoc: [Easy EBook and documentation generator](#)

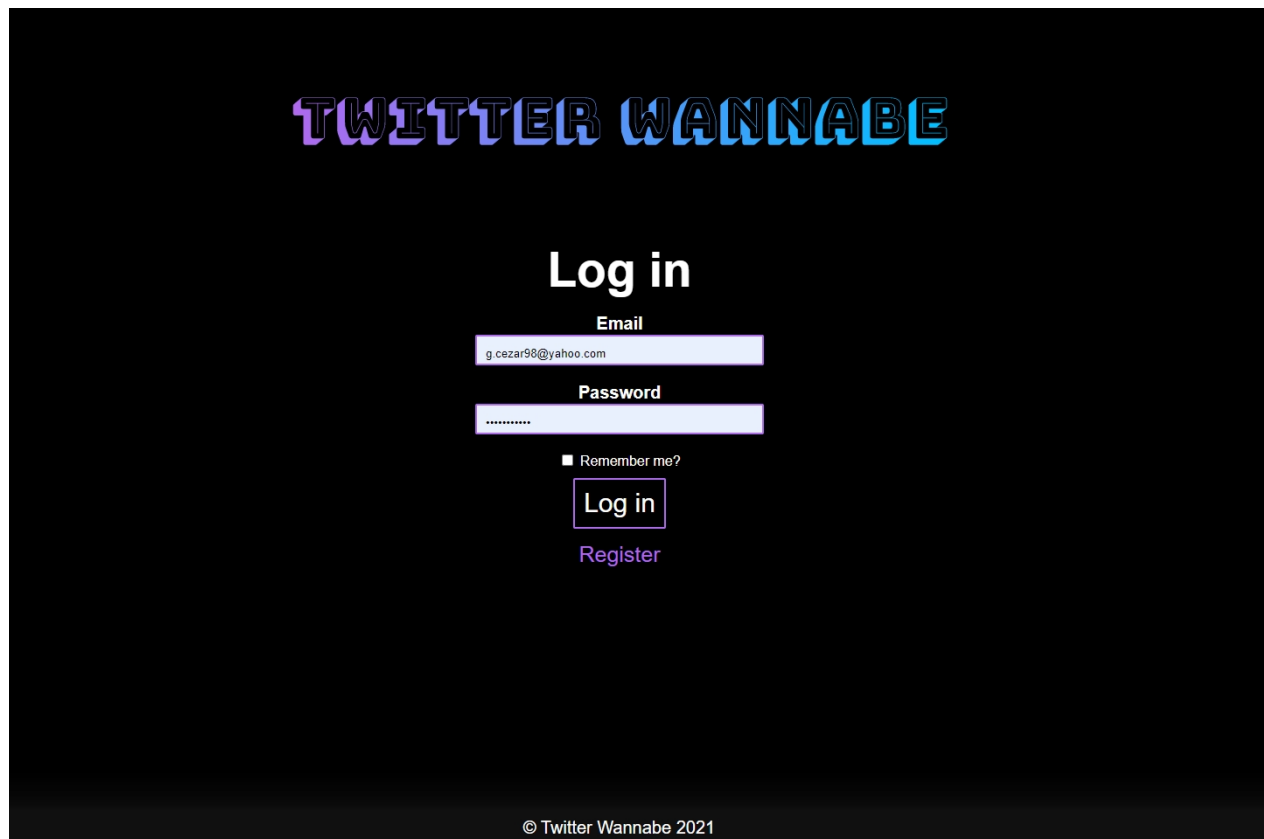

Features

Created with the Personal Edition of HelpNDoc: [Free Kindle producer](#)

Landing Page

Landing Page

The landing page is the first one that user will get in contact with. If you are not logged into account, you'll be automatically redirected to Log-In page. In this page we can observe title of the website, "Remember me?" button for an easier authentication, Log-In Button also for authentication. Register Button to create a new user.

Create Public Profile

Create Public Profile

The program allows us to create our public profile through which we are uniquely identified. To be able to use our profile, firstly, we need to register to Database with a unique email address and a password that we need to remember always when we log in. Password needs to contain : at least 1 lower letter, upper letter, digits, signs. Also the minimum length is 6 characters. The program will transmit us if the password and confirm password are not matching or if the email is not valid.
